Summary

Fullstack developer skilled in React, Node.js, TypeScript, and JavaScript. Experienced in building responsive, accessible, and maintainable applications with clean, modular architecture. Successfully delivered individual and team projects using Agile practices, Git workflows, and REST API integration. Background in technical support and e-commerce strengthens communication, analytical thinking, and problem-solving. Motivated to grow in modern, user-centric web development with future interest in mobile technologies and AI-driven application integrations.

Work experience

MAYAK - NGO Social Support Platform   Oct 2025 - Present
Fullstack Developer (Volunteer)

- Contribute to a Next.js–based platform for social and community initiatives.
- Created a staging database environment and improved CI/CD configuration.
- Updated and maintained documentation for onboarding and internal workflows.
- Refactored validation logic in the React-Admin interface.
- Currently implementing a new partner application form (frontend and backend).

Shuzy.Online   Oct 2019 - May 2022
Online Store Owner

- Set up and operated an online store using Insales and PromUA, including template customization, domain configuration, and basic integrations.
- Developed a Python script to automate catalog updates via Google Sheets.
- Managed customer communication, order processing, and day-to-day operations.
- Handled basic SMM activities and ensured consistent service quality.

Achievement: Successfully launched and grew a small e-commerce business.

Project experience

Podorozhnyky | Live Demo · GitHub   Sep 2025
Tech stack: Node.js, Express.js, MongoDB, React, Redux Toolkit, Vite, Axios.
Role: Frontend Team Lead.

- Led frontend setup and base configuration in a monorepo (TurboRepo).
- Implemented full authentication flow (register, login, refresh, logout).
- Refactored the profile page and separated "Saved" vs "Created" stories.
- Managed task distribution, code reviews, and maintained clean, reusable component structure.

TravelTrucks | Live Demo · GitHub   Jul 2025
Tech stack: React, Redux Toolkit, Vite, Axios, MUI, Formik.
Role: Developer.

- Built a single-page application for browsing and booking campers.
- Implemented catalog with server-side filtering and pagination.
- Added camper details with tabs, gallery, booking form, and favorites.
- Applied modular structure, reusable components, and clean API integration.

ArtistsHub | Live Demo · GitHub   May 2025
Tech stack: HTML, CSS, JavaScript, REST API, Vite, MVP architecture, Git/GitHub.
Role: Team Lead, developer.

- Led and coordinated the team, managed sprints, reviewed code.
- Implemented key modules: REST API integration, reusable modal window system, filtering (search, sort, genre filters), and general code refactoring.
- Enhanced skills in modular architecture (MVP), API, and performance optimization.
